STAR TEST Prep Math Workshop

The Spring Break is the last break of the school year. It is a good time to preliminary sum up student achievement. On one hand, a substantial portion of the curriculum has been already covered; on the other hand, it is not yet late to take care of any flaws and successfully finish the school year. Thus, it comes as no surprise that late spring is well known as a testing time. While a student may be overloaded with the school work and many other activities during regular school weeks, the week of a Spring Break can be a good time for **an intensive academic workshop in a very different format.**

What we are offering

Classic Math School STAR TEST Prep Math Workshop is a five-day (one-week) intensive instructional program designed to ensure that students master the **California Math Standards.**

New! Math Olympics Program for the students already mastered the standards and enjoying challenging Math.

Each day session includes practice assignments, timed tests and detailed analysis of the test scores for each student, to identify skill areas that require emphasis. Additional instruction and guided practice conducted **by a professional teacher in a small group setting** will eliminate the problem areas revealed by the practice tests.

We prepare students with test-taking strategies designed to make them better at taking any type of Math tests.

- Using time efficiently
- Understanding and following detailed written directions
- Checking answers
- Placing answers correctly on the answer sheets
- Using the problem-solving tactics of estimating, working problems backward and educated guessing
- Practicing with questions that contain “none of above”, “all of above”, “not here”, negative wording, and true-false statements.

Have a great Academic Break!

How to apply

- Fill out “Spring Break Math Workshop Application” (below)
- Contact Classic Math School to make an appointment for the Placement Test and interview (call **510-440-0929** or email **mathschool@comcast.net**)
- Take the Placement Test (bring this application with you)
- Get the class assignment and schedule
